

Datasheet
4MHz Ultrasonic
Thickness Gauge
Part Number - THKGAUGE4MX

- Pipe wall thickness range: 2 – 50 mm
- 4 MHz Piezo-Composite Sensor
- IP68 (10 metre water pressure)
- Robust construction using high performance PEEK thermoplastic material.
- Rugged Polyurethane Cable and Military Connector
- Temperature Range: -20 to +100C.

The **THKGAUGE4MX** is ONEFLOW's general wall thickness gauge. It uses an advanced multiple echo technique that ignores coating thickness. For use on all pipe materials in the range of 2 – 50 mm with any 400 series flowmeter.

Flowmeter Sensor type code:

Part number ordering information.

THKGAUGE4MX – 3 m cable only. Supplied in case with a 6mm calibration block.
